## Skills

---

**Languages:** HTML 5 | CSS3 (+ SCSS, BEM) | JavaScript ES6+ | Typescript

**Frameworks:** React (+ hooks) | Next.js | Material-UI | Redux | Tailwind

**Technology:** NPM | Git | Yarn | React dev tools | Firebase | jQuery | BitBucket | Github | Amplify

## Experience

---

### Frontend Developer Internship | [Internship](#) | (September 2021 – December 2021)

#### Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transformation and carousels
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

### Freelance Frontend Developer | (August 2022 – Current)

- Delivered professional websites using HTML5, CSS3 (+ SCSS, BEM), JavaScript and React best practices
- Improved website performance by compressing, caching and lazy loading images and components
- Included SEO, responsive, multi-platform a hosting support, enabling their website to be used by any browser or device in the world

### Frontend Developer Support | (January 2022 – Current)

- Supported many people in different social apps to solve their problems in HTML, CSS, Flexbox, JavaScript and React best practices
- Utilized debugging best practices using Google Chrome inspect element tooling
- Simplified different programming concepts including responsive website development, CSS layout, Promises and API requests

### React Js Developer | (October 2023 – December 2023)

#### Flex Business Solution

- Created different user experiences by implementing features like drag-and-drop, increasing user engagement.
- Reduced data memory usage by 30% through code optimization, improving the overall performance by reducing the time of the execution of the code.
- Simplified the code by 20% by removing unnecessary lines. This resulted in a better understanding of the code within the team, resulting in better collaboration and maintenance.

## Projects

---

### Portfolio Website: ([firdegjepali.com](https://firdegjepali.com)) - ([Github](#))

- My personal website highlights all of my programming skills and contains the source code with the links for all the projects listed down below.

### Search Engine (Google Clone): ([Live View](#)) – ([Github](#))

- Fetches data from the Google Search API to bring up the exact results like the original Google
- Built using React, JavaScript, CSS and HTML best practices

### Netflix 2.0: ([Live View](#)) – ([Github](#))

- Fetches data from the omdbapi API website to search any kind of movie just like the original Netflix and also display the currently trending movies.
- Built using React, JavaScript, CSS and HTML best practices.

## Education

---

### Frontend Developer Bootcamp (June 2021 – August 2021)
